DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Application claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over patent claims 1-14 of U.S. Patent No. 6,703,971 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other. The difference between application claim 1 and patent claim 1 is application claim 1 no longer explicitly claims a location aided server, and adds that the communication system is capable of communication with a location aided server. However, the patent claim refers to transferring location aided server data (col. 9, lines 14-16), so the communication system is of patent claim 1 is capable of communication

Art Unit: 3662

with a location aided server. It would have been obvious to use the system of patent claim 1 without a specific location aided server, since multiple manufactures make location aided servers, and so a system capable of being used with a location server without being limited to a specific one would allow a more flexible system.

The limitations added in application claims 2-14 are identical to the limitations added in patent claims 2-14.

Response to Arguments

2. Applicant's arguments have been fully considered and are persuasive. The objections/rejections have been withdrawn. A new double patenting rejection has been added.
